Održan je seminar-obuka za trenere u korištenju i podučavanju pikada za slijepe u sklopu Erasmus+ projekta Darts4Blind.

Treneri su usvojili znanje o provedbi treninga modificiranog sporta za slijepe i slabovidne osobe. Voditelj projekta je Kahramanmaraş Sütçü İmam Üniversitesi, a partneri su Budapest Association for International Sports, Município de Lousada, te CooperHabile Cooperativa sociale onlus.

We marked the International Day of Persons with Disabilities with an event at the Faculty of Health Studies Rijeka, where dr.sc.proft. Hrvoje Vlahović and Croatian first Paralympic triathlete Antonio Franko gave a lecture to physiotherapy students. The topics were sports for people with disabilities, paralympic sports, adapted recreational sports and Erasmus+ projects promoting sports for specific groups of people with disabilities like Darts4Blind.

U sklopu projekta "Darts 4 blind" proveli smo diseminaciju projekta na koju smo pozvali slabovidne osobe, te im predstavili našu projektnu brošuru o koristi sporta za osobe s intelektualnim poteškoćama

As part of the "Darts 4 blind" project, we disseminated a project to which we invited visually impaired people, they presented our project brochure on the use of sports for people with intellectual disabilities

Sport and social inclusion

For most people, sport is a great way to stay active, healthy and happy. It is also a great way to meet new people and make friends. For people with visual impairments, sport can be a challenge, but it is also a great way to stay active and healthy. The Darts 4 Blind project is a great example of how sport can be adapted for people with visual impairments. It is a project that aims to help people with visual impairments to become more active and healthy. The project is run by a group of volunteers who are all people with visual impairments. They are all passionate about sport and want to help other people with visual impairments to become more active and healthy. The project is run in a friendly and supportive environment. It is a great way to meet new people and make friends. The project is also a great way to stay active and healthy. Darts 4 Blind

FOR PERSONS WITH VISUAL DISABILITIES

One of our most important sensory organs is the eyes. To perceive and interpret the outside world, light enters the eye and is converted into a signal that the brain can understand. For people with visual impairments, this process is disrupted. They are unable to see the world as it is. This can be a very challenging experience. However, there are ways to help people with visual impairments to see the world. One way is to use a guide dog. Another way is to use a white cane. A third way is to use a Braille display. The Darts 4 Blind project is a great example of how sport can be adapted for people with visual impairments. It is a project that aims to help people with visual impairments to become more active and healthy. The project is run by a group of volunteers who are all people with visual impairments. They are all passionate about sport and want to help other people with visual impairments to become more active and healthy. The project is run in a friendly and supportive environment. It is a great way to meet new people and make friends. The project is also a great way to stay active and healthy.

Regular physical activity is great for people's health, development and helps prevent and relieve mental health issues.

Members of Rijeka sports association for persons with disabilities have visited Sports and recreational club for blind persons "Rijeka". We have talked with president of the club, mr. Ivan Kombol, who was participating in a meeting for Erasmus + project "Darts 4 blind" in Kahramanmaras, Turkey and with ms. Helena, clubs secretary. Mr. Kombol is very interested in projects dynamics, especially since members of his club are projects target group and are participating in project activities.

U srijedu smo ponovno posjetili Udrugu slijepih Primorsko-goranske županije, kako bi nastavili odvijati sportske aktivnosti u sklopu Erasmus+ sports programa.

Cilj je potaknuti slijepe i slabovidne osobe na sportske aktivnosti, specifično na rekreativno bavljenje pikadom. Kroz projekt je osmišljena prilagođena tehnologija ne bi li se osobama s poteškoćama olakšao taj sport, na način da konopčić služi kao orijentir. Ovoga puta sve su slijepe i slabovidne osobe imale posebne naočale, odnosno povež za oči koji ne propušta svjetlost, kako bi osobe s različitim stupnjem sljepoće tijekom natjecanja imale jednake uvjete za sve natjecatelje.

Voditelj projekta je Kahramanmaraş Sütçü İmam Üniversitesi, a partneri su Budapest Association for International Sports, Município de Lousada te CooperHabile Cooperativa sociale onlus.

On Wednesday, we visited the Association of the Blind of the Primorje-Gorski Kotar County again, in order to continue the sports activities within the Erasmus + sports programme. The goal is to encourage blind people to sports activities, this time specifically to recreational darts. Through the project, customized technology has been designed to make it easier for people with disabilities to take up the sport.

This time, all blind and partially sighted people wore special glasses, ie a blindfold that does not transmit light, so that people with varying degrees of blindness during the competition have equal conditions for all competitors.

The project leader is Kahramanmaraş Sütçü İmam Üniversitesi, and the partners are the Budapest Association for International Sports, Município de Lousada, and CooperHabile Cooperativa sociale onlus.
